Projects

Paint Project

09/2017

Over five weeks this class project required implementation of an image editing application with a feature set derived from Microsoft Paint. Implementation included using Java and JavaFX and use of an iterative/spiral software development model and heavy use of a variety of APIs in Java, with a focus on code quality and best OO design practices.

Renaissance French Cookbook

08/2016

As a first-year student I worked with other students and university professors for a semester to digitize a Renaissance French cookbook. The end goal was to display the transcribed cookbook to a webpage. Regular meetings were held to check progress and manage deadlines. More information (scholar.valpo.edu/cus/654/)

Time Card Application

07/2015

Individual project to help aid in completion of time cards for my assistant pool manager position. Using Android Studio, I designed a mobile application, written in Java, with inputs of time in AM or PM that outputs the total time difference.
